

Waste Electrical and Electronic Equipment Regulations 2006

From the 1st July 2007 the Waste Electrical and Electronic Equipment Regulations 2006 (the WEEE Regulations) came into effect in the UK. The aim of the regulations is to reduce the amount of WEEE going to landfill for disposal. This will be achieved by promoting the separate collection of waste electrical or electronic equipment (WEEE) and its re-use, recycling, recovery and environmentally sound disposal. This approach saves energy, resources and avoids hazardous materials from going to landfill.

Any product that requires electricity or batteries to enable it to perform its primary function would be classed as electrical or electronic equipment (EEE); everyday examples with regard to Andrews Sykes product range would be a heater, electrically controlled pump or air conditioning unit.

Products which are classed as EEE and are covered by the regulations must display a crossed out wheeled bin symbol on the product; or if this is not possible the symbol must be displayed on the packaging, the instruction leaflet and the warranty. Products displaying a black bar beneath the wheeled bin denote EEE placed upon the market after the 13th August 2005; products without the black bar are placed on the market prior to the 13th August 2005.

This symbol allows you to identify WEEE products and dispose of them separately from other waste when it reaches the end of its useful life.

From the 1st July 2007 Andrews Sykes will provide a Free of Charge 'take back' service to our customers for your old WEEE products on a like for like basis when you purchase a new item of EEE from Andrews Sykes *. This offer applies to new EEE products that are purchased directly from our outlets. The WEEE product will then be re-used, recycled or recovered in an environmentally sound manner.

*** WEEE should be deposited at an Andrews Sykes outlet when you purchase the replacement item of EEE or should be available for collection when the new EEE is delivered. If additional collections are required these will be charged at an agreed rate.**
