Chairman's Statement

Overview

During the first half of 2014, the group faced a number of challenges which had a detrimental impact on our trading performance for the period. Overall, the group's revenue for the six months ended 30 June 2014 was £26.8 million, a decrease of £3 million compared with the same period last year. As a consequence operating profit fell by £2.1 million from £6.4 million in the first half of 2013 to £4.3 million for the six months ended 30 June 2014.

Despite the above disappointing news, the group continues to be profitable and cash generative. Cash generated from operations was £4.2 million (2013: £7.6 million) and although net funds were reduced by £3.8 million from £19.1 million as at 31 December 2013 to £15.3 million as at 30 June 2014 this was after paying the 2013 final dividend of 11.90 pence per share, or £5 million in total, during the period.

Management continue to safeguard the operational structure of the business. Cash spent on new plant and equipment, primarily hire fleet assets, amounted to £1.3 million and a further £0.4 million from stock was also added to the hire fleet. We have continued our policy of pursuing organic growth within our market sectors and start up costs of the new businesses discussed in the 2013 Strategic Report continue to be expensed as incurred. A new depot in Paris has been opened in the second half of 2014 and continuing investment in both our existing core businesses and the ongoing development of new operations and income streams will ensure that we remain in a strong position and will safeguard profitability into the future.

Operations review

Our main hire and sales business segment in the UK and Europe faced a number of challenges as well as opportunities during the first half of 2014. In the UK the wet weather during the period stimulated the demand for our pump hire business which returned a strong operating performance. Non-weather dependent contracts continue to be sought with some new contracts being won in the period. Demand for our air conditioning products started earlier than last year with a spell of warm weather in the early summer. Unfortunately all of these positive factors were more than offset by the decline in the heating business which was severely affected by the unseasonably mild winter conditions.

The main factor affecting the segment's result for this period was the poor performance of our trading in the Netherlands. As with the UK, the Netherlands had an unseasonably mild winter with a consequential impact on the heating business. The effect was made worse by a decline in the construction sector in the Netherlands, particularly the housing market, which is one of our principal trading sectors. The performance of our Belgian and Italian operations were also affected by the mild weather, albeit to a lesser extent.

Our newly established businesses in France, Switzerland and Luxembourg continue to trade in line with our expectations.

Andrews Air Conditioning & Refrigeration, our UK air conditioning installation business, produced an operating profit that was £0.1 million below the level achieved last year. The UK installation market is becoming very price competitive which is not sustainable in the long term. We continue to offer a first class service at a fair price which we believe to be the best long term strategy.

Khansaheb Sykes, our long established business based in the UAE, had a slow start to the year. A number of contracts were delayed but June saw some improvements in both Dubai and Abu Dhabi in our traditional dewatering, sewage and general pump hire activities. The climate rental division that was started in 2012 continues to make a positive contribution but had mixed fortunes in the period. Overall, the operating profit of Khansaheb Sykes was £0.4 million lower than the same period last year.

Profit for the financial period and Earnings per Share

Profit before tax was £4.1 million (2013: £6.7 million) reflecting both the above £2.1 million decrease in operating profit and an increase in net finance costs of £0.5 million compared with the same period in 2013. Net finance costs increased primarily due to an inter company foreign exchange loss of £0.3 million, compared with a gain of £0.2 million in 2013, due to a strengthening of Sterling compared with both the Euro and other currencies.

The tax charge reduced by £0.6 million from £1.5 million last half year to £0.9 million for the six months ended 30 June 2014. The group's effective tax rate increased slightly from 22.0% last half year to 22.7% this period mainly due to a reduction in profits earned in low tax regions overseas and unrelieved overseas losses. A reconciliation of the theoretical corporation tax charge based on the accounts profit multiplied by the UK annualised corporation tax rate of 21.5% and the actual tax charge is given in note 4 of these interim accounts.

Profit after tax was £3.2 million (2013: £5.2 million). There were no share buy backs in either period so this fall in profits had a direct impact on earnings per share which fell from 12.32 pence for the first half of 2013 to 7.59 pence for the period under review.

Dividends

The directors did not declare or pay any interim dividends during the six months ended 30 June 2014.

The final dividend of 11.90 pence per ordinary share for the year ended 31 December 2013 was approved by members at the AGM held on 17 June 2014. Accordingly on 19 June 2014 the company made a total dividend payment of £5,029,000 which was paid to shareholders on the register as at 30 May 2014.

The board continues to adopt the policy of returning value to shareholders whenever possible. Despite the downturn in trading, the group remains profitable, cash generative and financially strong. Accordingly the board has decided to declare an interim dividend for 2014 of 11.90 pence per share which in total amounts to £5,029,000. This will be paid on 2 December 2014 to shareholders on the register as at 7 November 2014. The shares will go ex-dividend on 6 November 2014.

Outlook

Trading in the third quarter to date has been disappointing. Although in both the UK and Northern Europe warmer weather arrived earlier than last year, it was not sustained and did not reach the temperature peaks of 2013. Whilst both June and July were warm, August was disappointingly cool and wet thereby affecting the performance of our air conditioning hire business and this is continuing to have an impact into September.

Activity in the Middle East was, as expected, quiet in July due to Ramadan but the anticipated upturn in the last five months of the year has so far failed to materialise.

The weather for the final quarter of 2014 is currently an unknown factor and may significantly affect the outcome for the year. The board remains cautiously optimistic that the group will return a satisfactory performance for the remainder of 2014.

Notes to the consolidated interim financial statements for the six months ended 30 June 2014

1 General information

Basis of preparation

These interim financial statements have been prepared in accordance with International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS) as adopted by the European Union and with the Companies Act 2006.

The information for the 12 months ended 31 December 2013 does not constitute the group's statutory accounts for 2013 as defined in Section 434 of the Companies Act 2006. Statutory accounts for 2013 have been delivered to the Registrar of Companies. The auditor's report on those accounts was unqualified and did not contain statements under Section 498(2) or (3) of the Companies Act 2006. These interim financial statements, which were approved by the Board of Directors on 25 September 2014, have not been audited or reviewed by the auditors.

The interim financial statement has been prepared using the historical cost basis of accounting except for:

- (i) properties held at the date of transition to IFRS which are stated at deemed cost;
- (ii) assets held for sale which are stated at the lower of fair value less anticipated disposal costs and carrying value; and
- (iii) derivative financial instruments (including embedded derivatives) which are valued at fair value.

Functional and presentational currency

The financial statements are presented in pounds Sterling because that is the functional currency of the primary economic environment in which the group operates.

2 Accounting policies

With the exception of the disclosure of pension scheme interest on a net basis in accordance with IAS 19 (revised), these interim financial statements have been prepared on a consistent basis and in accordance with the accounting policies set out in the group's Annual Report and Financial Statements 2013.

3 Revenue

An analysis of the group's revenue is as follows:

	6 months ended 30 June 2014 £'000	6 months ended 30 June 2013 £'000	12 months ended 31 December 2013 £'000
Continuing operations

Group consolidated revenue from the sale of goods and provision of services	26,759	29,774	61,072

4 Taxation

	6 months ended 30 June 2014 £'000	6 months ended 30 June 2013 £'000	12 months ended 31 December 2013 £'000
Current tax			
UK corporation tax at 21.5% (30 June 2013 and 31 December 2013: 23.25%)	929	1,048	2,567
Adjustments in respect of prior periods	-	-	(109)
Overseas tax	14	344	592
Adjustments to overseas tax in respect of prior periods	-	-	(22)
Withholding tax	-	-	39
Total current tax charge	943	1,392	3,067
Deferred tax			
Deferred tax on the origination and reversal of temporary differences	(1)	80	329
Adjustments in respect of prior periods	-	-	50
Total deferred tax charge	(1)	80	379
Total tax charge for the financial period attributable to continuing operations	942	1,472	3,446

The tax charge for the financial period can be reconciled to the profit before tax per the income statement multiplied by the effective standard annualised corporation tax rate in the UK of 21.5% (30 June 2013 and 31 December 2013: 23.25%) as follows:

	6 months ended 30 June 2014 £'000	6 months ended 30 June 2013 £'000	12 months ended 31 December 2013 £'000
Profit before taxation from continuing and total operations	4,148	6,680	14,964

Tax at the UK effective annualised corporation tax rate of 21.5% (30 June 2013 and 31 December 2013: 23.25%)	892	1,553	3,479
Effects of:			
Expenses not deductible for tax purposes	53	61	119
Movement in overseas trading losses	106	51	146
Effect of different tax rates of subsidiaries operating abroad	(109)	(193)	(339)
Withholding tax	-	-	39
Non-taxable income from other participating interests	-	-	(45)
Effect of change in rate of corporation tax	-	-	128
Adjustments to tax charge in respect of previous periods	-	-	(81)
Total tax charge for the financial period	942	1,472	3,446

The total effective tax charge for the financial period represents the best estimate of the weighted average annual effective tax rate expected for the full financial year applying tax rates that have been substantively enacted by the balance sheet date. Accordingly UK corporation tax has been provided at 21.5%; the reduction to 21% for the tax year ending 31 March 2015 having been substantially enacted on 2 July 2013. UK deferred tax has been provided at 20% being the rate substantially enacted at the balance sheet date at which the timing differences are expected to reverse.

5 Earnings per share

Basic earnings per share

The basic figures have been calculated by reference to the weighted average number of ordinary shares in issue and the earnings as set out below. There are no discontinued operations in any period.

	<u>6 months ended 30 June 2014</u>	
	Continuing earnings £000	Number of Shares
Basic earnings/weighted average number of shares	<u>3,206</u>	42,262,082

The above interim dividend was charged against reserves during the 6 months ended 30 June 2013 and included on the balance sheet as a current liability as at 30 June 2013. The amount was paid on 24 July 2013.

The directors declared and paid the following interim dividends during the 12 month period ended 31 December 2013:

	12 months ended 31 December 2013	
	Pence per share	Total dividend paid £000
Interim dividend declared on 18 June 2013 and paid to shareholders on the register as at 28 June 2013 on 24 July 2013	8.90p	3,761
Interim dividend declared on 28 October 2013 and paid to shareholders on the register as at 8 November 2013 on 3 December 2013	8.90p	3,762
	<u>17.80p</u>	<u>7,523</u>

The above interim dividends were charged against reserves during the 12 months ended 31 December 2013.

7 Retirement benefit obligations - Defined benefit pension scheme

The group closed the UK group defined benefit pension scheme to future accrual as at 29 December 2002. The assets of the defined benefit pension scheme continue to be held in a separate trustee administered fund.

As at 30 June 2014 the group had a net defined benefit pension scheme surplus, calculated in accordance with IAS 19 (revised) using the assumptions as set out below, of £1,681,000 (30 June 2013: £2,906,000; 31 December 2013: £1,204,000). The asset has been recognised in the financial statements as the directors are satisfied that it is recoverable in accordance with IFRIC 14.

Following the triennial recalculation of the funding deficit as at 31 December 2013 a revised schedule of contributions and recovery plan has been agreed with the pension scheme trustees in June 2014. Based on this schedule of contributions, which is effective from 1 January 2014, the best estimate of the employer contributions to be paid during the year commencing 1 January 2014 is £905,000. Thereafter, the group does not expect to make any further contributions to the pension scheme, other than a contribution towards expenses that has been capped at £120,000 per annum, until the next funding valuation as at 31 December 2016 is agreed with the pension scheme trustees.

Assumptions used to calculate the scheme surplus

A qualified independent actuary has updated the results of the December 2010 full actuarial valuation to calculate the surplus as disclosed below.

The major assumptions used in this valuation to determine the present value of the scheme's defined benefit obligation were as follows:

	30 June 2014	30 June 2013	31 December 2013
Rate of increase in pensionable salaries	N/A	N/A	N/A
Rate of increase in pensions in payment	3.30%	3.20%	3.40%
Discount rate applied to scheme liabilities	4.20%	4.60%	4.40%
Inflation assumption - RPI	3.40%	3.30%	3.50%
Inflation assumption - CPI for the first 6 years	2.40%	2.30%	2.50%
Inflation assumption - CPI after the first 6 years	2.40%	2.30%	2.50%

From 1 January 2011, the government amended the basis for statutory increases to deferred pensions and pensions in payment. Such increases are now based on inflation measured by the Consumer Price Index (CPI) rather than the Retail Price Index (RPI). Having reviewed the scheme rules and considered the impact of the change on this pension scheme, the directors consider that future increases to (i) all deferred pensions and (ii) Guaranteed Minimum Pensions accrued between 6 April 1988 and 5 April 1997 and currently in payment will be based on CPI rather than RPI. Accordingly, this assumption was adopted as at 31 December 2010 and for all subsequent periods.

Assumptions regarding future mortality experience are set based on advice in accordance with published statistics. The mortality table used at 30 June 2014 is 110% SINA CMI2013 (30 June 2013: 110% SINA CMI2012; 31 December 2013: 110% SINA CMI2013).

The assumed average life expectancy in years of a pensioner retiring at the age of 65 given by the above tables is as follows:

	30 June 2014	30 June 2013	31 December 2013
Male, current age 45	22.7 years	22.7 years	22.7 years
Female, current age 45	24.0 years	24.0 years	24.0 years
