

Case study 155

Temporary heating keeps Essex leisure centre open

At Andrews Heat for Hire, we understand that equipment failure can have damaging implications on your business if not addressed immediately. This is why we are fully equipped with the resources to serve all sectors and strive to react to enquiries within hours of initial contact.

So when one of the largest leisure centres in Essex had to decommission their boiler due to repairs and maintenance work, our specialist team were drafted in to provide the client with a temporary heater hire solution

One of our experts visited the site, to review the application and come up with an effective solution that would maintain the desired temperature within the limited space.

Following the survey, a FH111 indirect fired oil heater was positioned outside the building, with the warm air being ducted through a side access door. Additional ducting was provided to accommodate the substantial volumes of required – allowing two areas of the pool to be heated at once.

The client requested an out of hours service, which made it possible for our engineer to have the heater rental fully installed and running on the same day of enquiry. By providing this service, the swimming pool was able to remain open to the public with no disruption to the centres opening hours.

Nominal heating duty 110 kW
Air flow (max) 8,000 m³/h
Typical heated area 2,440 m³
Power supply 230/110 V 1ph 50 Hz
Plug type BS4343 230 V 16 A BS4343
110 V 32 A
Noise level (max) 79 dBA @ 1 metre
Weight 380 kg
Dimensions (mm) 2,230 x 780 x 1,340
Duct length (max) 40 metres
Fuel consumption 10.9 l/h
