

Case study 203

Replacement Boiler for Hotel

A hotel located on the seafront of Weston-Super-Mare, in Somerset, contacted Andrews Boiler Hire to request a free site survey. The hotel needed a replacement boiler in preparation for the New Year. The existing heating system had been in place for a number of years and the hotel was experiencing numerous heating and hot water failures. Therefore the hotel put aside some of its capital expenditure to put in place a new, economical boiler system, whilst the new system was being installed the hotel require a reliable temporary boiler unit.

The client's main priority was to find a system that had a low carbon footprint and economical to run. After a qualified Andrews engineer visited the hotel, they suggested the installation of a 100kW packaged boiler and ancillaries.

The 100kW packaged boiler is ideal for use in situations that require heat and hot water. All packaged boilers from Andrews Boiler Hire are housed in vandal proof and thermally insulated steel containers. After the boiler was ordered, it was immediately delivered and fully installed. We also provided a fuel management service for the client alongside the continual support and maintenance of all equipment on hire.

The hotel now has a constant hot water and heating supply for every room in the hotel which is delivered immediately via this very effective packaged boiler. Since installation several courtesy calls have been made to the hotel to ensure that system is working perfectly and the client has been extremely pleased with the service provided.
