Urgent Office Cooling In Lancashire

With the UK's widest range of portable air conditioners for hire and sale, Andrews have the resources and staff to accommodate businesses in virtually any industry. In recent years, we have developed a reputation for providing bespoke, cost-effective and environmentally friendly cooling in line with any requirement or budget. So when a prominent facilities management company contacted us seeking temporary air conditioning for an office complex, we were able to provide units within four hours of the initial enquiry.

When hot temperatures began to affect working conditions for staff, our client originally approached a different contractor in search of a solution. Unfortunately, exhaust tube units were wrongly recommended and proved ineffectual because of the premises' design and layout. Due to a lack of space above the suspended ceilings, hot air kept returning downwards which meant the vicinity wasn't cooling down.

Following a site survey, a technician advised the customer to hire split type units instead, which ensures warm air is ducted outside. Two PAC22 air conditioners were subsequently delivered to the offices at short notice and fully operational on the same day of call-out. Our quick response enabled the company's employees to continue working and made the surroundings more comfortable for those inside.

This proved to be an adequate remedy to the original problem and helped maintain the usual levels of productivity expected from people working in the building. The client has a long track record of requesting our assistance – particularly with both pumps and HVAC applications – and confirmed they will continue to use our services when the need next arises.

Nominal cooling duty 6.5 kW
Indoor noise level (max) 65 dBA@3 m
Typical cooled area 156 m²
Outdoor noise level (max) 62 dBA @2 m
Power supply 230 V 1 ph 50 Hz
Run 11 A
Indoor weight 119 kg
Control Automatic thermostat
Outdoor weight 20 kg
Average power consumption 2.4 kW/hr
Outdoor dimensions 285 x 565 x 520 mm
Indoor dimensions 820 x 390 x 1,245 mm
PAC line length 5 metres (max 30 metres)
