Literature Festival Requires Temporary Air Conditioning

Andrews Sykes recently provided cooling for a literacy festival event, located off the striking Welsh borders. The festival was divided in several marquees and cabins which held a variety of events from famous authors to poets and musicians.

The problem was that some of the cabins on site contained a large amount of electrical equipment which consequently caused some overheating to occur. Andrews Air Conditioning Hire provided two Polar Wind 4.1 kW Exhaust Type air conditioning units, they were placed strategically in the different cabins, so that the space would not be compromised, whilst still managing to provide adequate cooling to the event. The Polar Wind is one of the most popular units in the market, it also has a fully automatic thermostat and a remote control, it's totally portable and can be positioned to direct a welcome breeze of cool air anywhere in a room. The job was specified on site by one of our engineers, ensuring for the best solution on last minute changes.

This 27 year old festival has brought writers, poets, scientists and comedians from all over the globe, to share their work and talk about their stories. The event was a success, the areas that had previously overheated were kept cool and the clients were delighted. After many years of working with the festival, Andrews Sykes have established a close relationship based on our service and quality.

Nominal cooling duty 4.1 kW
Weight 45 kg
Air flow (max) 360 m³/h
Dimension 400 x 480 x 840 mm
Power supply 230 V 1 ph 50 Hz Run 9 A
Control Remote with automatic thermostat
Noise level (max) 56 dBA @ 1 metre
Average power consumption 1.8 kW/hr
Exhaust duct 2 metres x 127 mm diameter
