

Case study 609

Construction firm request pumps

As the UK's largest provider of specialist pump services, Sykes Pumps has both the expertise and necessary resources to oversee projects anywhere in the country. Our diverse range of units stored at depots nationwide ensures our customers can be reached regardless of their location – and at any time of day. Our frequent involvement with civil contractors has allowed us to develop an excellent understanding of requirements across all sectors.

We were recently approached by an independent supplier, who sought urgent pumping on behalf of one of their clients – a haulage company. The planned installation of a large underground tank necessitated professional assistance, so we sent a technician to a location in Cambridge to conduct a site survey. During the assessment, we were warned that a high standing water level and possibly even a degree of contamination were expected from the disturbed ground once the excavation process was in motion.

After a thorough inspection of the discharge water, we advised the customer to have a settlement tank installed to help remove any pollutants. A Sykes Super Wispa 100 pumpset was subsequently delivered, along with a 3000 litre fuel tank, bauer adaptors and discharge hoses. This equipment is ideal for all general purpose applications, and its ability to operate for hours unattended made it ideal for this particular assignment.

Local engineers from our Peterborough depot have continued to visit the site on a fortnightly basis to service the equipment and keep it running efficiently. The customer was very pleased with the solution provided and vowed to use Sykes Pumps again in the future, should need stipulate.

Weight 1685 kg with fuel/1500 kg without fuel
Dimension 2137 x 1250 x 1535
Performance Max head: 31 m / Max flow: 45 l/s / Max solid: 44 mm
Fuel Tank Capacity 158 litres
Fuel Consumption Typical fuel consumption on full load @ 1800 rpm: 5 litres/hour
Pipe Connections Suction: 4" Table D, Discharge: 4" Table D, Bauer couplings option
