

Northampton town fc seek air conditioning ahead of pre-season friendly

With clients ranging from sports clubs operating at the top level to everyday fitness centres and gymnasiums, Andrews Air Conditioning has a proven and extensive track record of supporting the sports and leisure industry.

In many cases, our relationships with customers span many years and are founded on an understanding that we deliver whatever is required in a prompt fashion.

This was once again evidenced on one of the hottest days of 2021, when Northampton Town FC approached us for a temporary cooling solution. A club representative called our Peterborough depot and specifically requested two portable Polar Wind units to reduce temperatures inside an office at their Sixfields Stadium.

The enquiry was received at 3pm in the afternoon, just a few hours before a friendly match against Nottingham Forest was due to kick-off. Despite the client effectively resigning themselves to equipment not being ready until the following day, we arranged for the kit to be delivered and installed less than two hours later – and all during the peak of summer!

Suffice to say, our contact at Northampton was absolutely delighted with the service we provided, specifically referencing their disbelief at the quick turnaround time.

Although The Cobblers eventually succumbed to a 2-0 defeat on the pitch, it is fair to suggest we did everything we could to ensure that conditions off the field were as good as they could have been!

Nominal cooling duty 4.1 kW
Air flow (max) 450 m³/h
Typical cooled area 99 m²
Power supply 230 V 1 ph 50 Hz Run 9 A
Noise level (max) 50 dBA @ 1 metre
Weight 34 kg
Exhaust duct 2.5 metres x 127 mm diameter
Plug type BS1363 230 V
Average power consumption 1.5 kW/h
Condensate Pumped via drain hose
Dimensions (L x W x H) 410 x 450 x 850 mm
Control Remote control with automatic thermostat
