CASE STUDY

Why Leading Studios Trust our 24/7 Expert Team to Deliver Warmth Before the Cameras Roll

When a critical heating breakdown threatened a major Surrey film studio at 5 pm, production schedules were put at immediate risk. Within just a few hours, Andrews Heat For Hire delivered a high-capacity **FH 2000S** heater, ensuring the stage was warm and filming could proceed without delay.

Why the **FH 2000S**? This indirect oil-fired heater delivers massive heat output (clean, fume-free air) making it perfect for enclosed, large-volume spaces like film stages.

Our team also completed the package with a **2,000 L Bunded Fuel Tank** fully fuelled with 2,000 L of diesel, delivering a completely self-sufficient, 92% energy-efficient solution ready for the following morning shoot.

Aurora FH 2000S Indirect Fired Oil Heater

1 CHALLENGE

The call came in at 5 pm. The studio's existing temporary heating unit had suffered a catastrophic breakdown.

With a full cast and crew scheduled to shoot the next morning, the temperature inside the massive venue was dropping rapidly. They needed an immediate solution that was powerful enough to heat the vast space.

2 SOLUTION

Understanding the urgency, our local response team mobilised immediately. We identified the **Aurora FH 2000S** as the optimal unit for the job due to its massive 200 kW output and external deployment capabilities.

Upon receiving the call at 5 pm, our team sprang into action. They prepped, tested, and loaded the heater alongside a **2,000 L Bunded Fuel Tank**, ensuring it was fully fuelled with diesel before leaving the depot. This proactive approach meant the unit arrived as a complete, self-sufficient package, ready to run continuously without the need for immediate refuelling.

3 OUTCOME

By the time our expert engineering team returned to the site the next morning for a routine performance check, the heater had done its job. The massive sound stage was warm, stable, and ready for the cameras to roll.

Because of this rapid intervention, the studio avoided costly delays. Impressed by the speed and reliability of the service, the client has now requested quotes to provide heating for the remaining film stages as production ramps up.
