CASE STUDY

Andrews Heat For Hire creates comfort and style for a large winter event in London

When a large-scale winter event in London required a powerful yet discreet temporary heating solution, Andrews Heat For Hire was appointed to design and deliver a bespoke system that would keep guests warm without compromising the venue's carefully curated aesthetic.

With hundreds of visitors expected each day, maintaining a comfortable indoor temperature across a large marquee was essential to guest experience, dwell time and overall event success.

That's why the **Aurora FH 185 DV indirect oil-fired heater** was selected. Its high heating capacity and fuel efficiency, combined with its suitability for safely heating occupied spaces, made it an ideal choice. The unit's ability to deliver consistent, high-volume heat ensured guest comfort throughout the marquee while preserving the event's carefully designed atmosphere.

Aurora FH 185 DV
Indirect Fired Oil Heater

1 CHALLENGE

The event took place inside a large winter marquee, where cold temperatures and heat loss made maintaining comfort a challenge.

Our client needed a heating solution that could provide consistent warmth in an occupied space while blending seamlessly with the dark, premium interior design. Reliable performance was essential to ensure guest comfort throughout long operating hours.

Conventional heating options risked uneven heat distribution and visible equipment that could detract from the overall atmosphere of the event.

2 SOLUTION

Andrews Heat For Hire team delivered a fully automatic operation solution using the indirect-fired heating **Aurora FH 185 DV**, paired with black perforated ducting.

Chosen for its exceptional output and efficiency, the heater is ideal for safely warming an occupied marquee. The perforated ducting ensured even heat distribution throughout the space while blending seamlessly with the event's colour scheme.

Carefully routed and discreetly installed, the system maximised airflow without distracting from the venue's premium look and feel.

3 OUTCOME

The bespoke heating system provided immediate, consistent warmth throughout the marquee, ensuring a comfortable environment for both guests and staff.

It performed reliably throughout the event, maintaining stable temperatures despite cold conditions outside.

The client was delighted with both the performance and appearance of the installation and has since asked Andrews Heat for Hire to return and deliver the same solution for this annual winter event.
