Andrews Boilers Restored Heating and Hot Water for a Specialist School After a Boiler Fire

CASE STUDY

Emergency Boiler Hire Restores Heating After Fire Damages School Boilerv

When a fire severely damaged the biomass boiler at a specialist school in North Wales, the facility was left without essential heating and hot water just as temperatures began to fall.

With student welfare a priority, the Andrews Boilers experts responded rapidly with an emergency boiler hire solution designed to restore services despite restricted access to the boiler house.

300kW Packaged Boiler

3,000 Litre Bunded Fuel Tank

1 CHALLENGE

When our team arrived on site, two problems stood out.

The fire had severely damaged the biomass system, so any temporary solution had to provide enough heating capacity for the entire school.

New fencing outside the gates also blocked access to the boiler house, so the installation had to work around this obstruction.

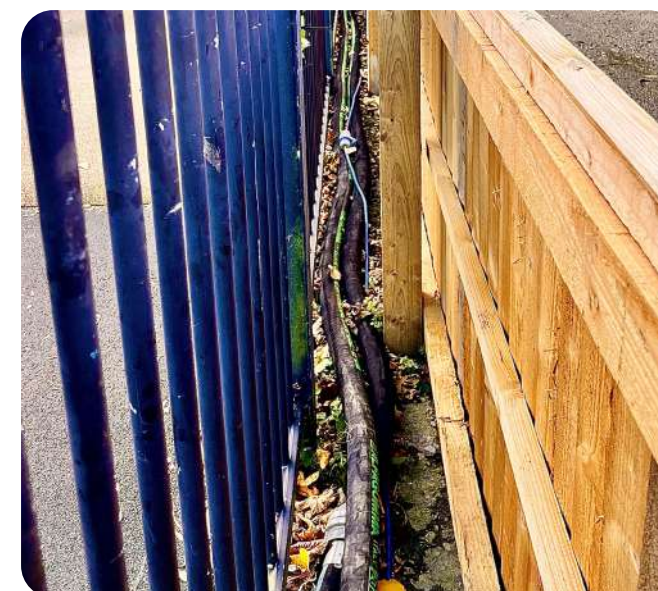

2 SOLUTION

Our engineers arrived at 8 am the next morning.

Equipment supplied:

- 1 x **300kW Packaged Boiler**
- 1 x **3,000 Litre Bunded Fuel Tank**
- Remote telemetry monitoring for fuel oversight

They manoeuvred the equipment carefully into position and completed the full installation without disturbing the fence.

3 OUTCOME

By 1 pm, heating had been restored across the whole school.

With the school relying on uninterrupted heating and hot water, rapid restoration was essential.

Our team found a practical way around the site restrictions and stayed until the job was done, keeping students warm and safe through the cold weather.
